- 1. What if I have used a recalled formula and child shows signs of illness, such as fever, poor feeding, crying, or very low energy? Call your child's health care provider and seek medical care right away.
- 2. How do I know if my infant formula is recalled? Please check Abbott website here www.similacrecall.com and select *Check Lot Number* to enter Lot Number.
- 3. What if I have recalled infant formula? Do <u>not</u> use recalled infant formula. Return any recalled Similac infant formula to the store where it was bought for an exchange, substitute product, store credit, or a cash refund.
- 4. Are WIC authorized stores allowed to exchange or refund my purchase of recalled infant formula? Yes, all WIC authorized stores received notification from TN WIC on 2/22/2022 to allow all WIC customers the option to exchange the recalled infant formula and/or receive a substitute infant formula, store credit, or a cash refund. Based on infant formula availability, the store may have limited options.
- 5. What if the store does not have an infant formula alternative to Alimentum or Elecare infant formula? Please ask your local Health Care Provider for a new Therapeutic Formula Request and return it completed to your local WIC clinic. Then, contact your local WIC clinic to make sure they received the completed Therapeutic Request and they will work with you to reissue a substitute.
- 6. Can TN WIC issue an alternate brand, type, or form of infant formula? Yes, TN WIC is allowing the below temporary formula substitutions through March 31, 2022.

TN WIC Temporary Formula Substitutions- Abbott Recall 2022

*Temporary Formula Substitutions will expire March 31, 2022
